

LTG survey: sound desk information

This survey is to gather information about the technical side of providing sound at your theatre and to share with other LTG Members for the benefit of all LTG Members. While some LTG Members have some good quality sound equipment, they may not fully utilise it while other LTG theatres with more experienced and or knowledgeable members with similar equipment can share their knowledge. LTG will, therefore, build technical information about members' sound (and lighting equipment in due course) which will be accessible to all LTG Members.

Please complete the information below to be part of this database.

* Indicates required question

1. Email *

2. 1 Your name *
